The Power of the Future— At Their Fingertips

Computer Society
Digital Library (CSDL)

**The Most Complete and
Authoritative Technology
Resource—Now Mobile Ready**

Over half a million peer-reviewed
technology documents for research,
projects, problem-solving, presentations,
collaboration, and study—NOW available
faster and even more conveniently.

The Resources They Need to Succeed

Your users need information they can rely on. The Digital Library delivers over 550,000 documents from the most authoritative sources—written by more than 300,000 content experts in the publications and events where new innovations are introduced and vetted. As a result, the Digital Library is the authoritative resource for leading-edge technologies as well as history, with exciting new additions every day. Here is a small sample of new topics entering the Digital Library this year:

- **Cloud Computing**—CSDL articles and conference proceedings on this essential topic include the newest thinking in the field, focusing on innovative research ideas and applications results.
- **Methodologies and Solutions for Mobile Application Security**—Unlike personal computers, ubiquitous mobile devices store much more personal information and attract attackers. Numerous CSDL documents address this issue.
- **Wearables, Beyond Wearables, and Human Augmentation**—New research addresses this fascinating and important topic.
- **Energy Sector Control Systems**—The special security and reliability requirements of this vital sector are addressed in new papers in the CSDL.
- **Smart and Connected Health**—New papers and research address the important role computing plays in individual and societal health.
- **Visual Analytics for Biological Data**—New pre-eminent systems approaches in biological and life sciences challenge computational visualization techniques and the CSDL explores the issues.
- **Big Data**—Even casual observers know big data is transforming our lives and placing a huge burden on the computer infrastructure. New research guides readers through the issues.
- **Web of Things**—Evolving from the Internet of Things, Web of Things will take advantage of web devices' and sensors' ability to observe and monitor the environment.
- **And many, many more.**

Now with the Fastest Search and Greatest Convenience

Just as the content of the Digital Library grows and changes with the times, so do the benefits for librarians and users.

- Now Mobile Ready—While the CSDL has always been convenient, now it's fully operational in the palm of a user's hand on a tablet or phone, as well as on the desktop. Carry the CSDL everywhere for instant access—no more searching unreliable sources.
- New, more user friendly interface makes interacting with the CSDL a pleasure.
- Institutional logos add your personalized touch to the CSDL experience.
- Faster search results prompt even more frequent usage—your users have the answers first.
- Browsing functionality is enhanced and pages render faster, increasing user satisfaction.
- The CSDL is now ADA compliant.
- Updated social media tools appeal to interactive users.

The Authorities in the Field

Most important to you is the quality of the information you provide, and the Digital Library is unmatched. Papers and articles derived from the most respected peer-reviewed publications in the world as well as the leading technical conferences make up this astonishing body of knowledge.

- *Computer* magazine—the flagship publication of IEEE Computer Society and the periodical in which most major technical advances in the field are introduced.
- PLUS—31 other leading peer-reviewed periodicals and 5,000+ publications from the most respected technical conferences, all developed by the leaders in computer technology. Among these publications are:

New this year—

- *IEEE Transactions on Big Data*
- *IEEE Transactions on Multi-Scale Computing Systems*

PLUS—

- *Computing in Science & Engineering*
- *IEEE Annals of the History of Computing*
- *IEEE Cloud Computing*
- *IEEE Computer Graphics and Applications*
- *IEEE Intelligent Systems*
- *IEEE Internet Computing*
- *IEEE Micro*
- *IEEE Multimedia*
- *IEEE Pervasive Computing*
- *IEEE Security & Privacy*
- *IEEE Software*
- *IT Professional*

The Digital Library also includes powerful information from all the principal technical conferences of the world—the leading edge of new research and development. Here are a few of this year's conferences:

- International Conference on Big Data and Smart Computing
- 2014 IEEE International Symposium on Performance Analysis of Systems and Software
- 30th IEEE International Conference on Data Engineering
- 2014 IEEE Real-Time and Embedded Technology and Applications Symposium
- 27th IEEE Conference on Software Engineering Education and Training
- 27th International Symposium on Computer-Based Medical Systems
- And hundreds more

Designed For and By Librarians and Their Users

Whether you're advising a senior researcher, a hurried student, or a professional in need of a fast answer, you want to be sure you're providing your users the best tools. Input from librarians and users have helped mold the features of the Digital Library. In addition to the new capabilities listed earlier—

- Up-to-the-minute RSS feed notifications of new content to keep users on the leading edge
- Full text searchable content for optimum access
- Multiple options for browsing and searching, including Basic, Advanced, Boolean, More Like This, and cross searches of the ACM library, reduces search time and speeds application
- OPAC and interactive reference linking, along with OpenURL and XML gateway compatibility make for quick, easy access
- Clickable equations in all HTML documents for ease-of-use by students and researchers
- Multimedia files in some content provide deeper understanding
- Customizable welcome message is automatically generated for your institution
- A personalized search page to manage saved searches, agents, and e-mail options
- Unlimited article printing at no extra cost to reduce library administration and costs

Digital Library—Pricing to Meet the Needs of Every Institution

To meet a wide variety of budgets and requirements, IEEE Computer Society has developed a range of packages and pricing structures that allow libraries to provide the most needed information to users. If you do not see a package that meets your specifications in the list below, please call to discuss other options.

To place an order:

1. Check the box of the package you are ordering
2. Complete the reverse side of this form
3. Return form with payment or your purchase order

Note: CSDL packages are available through www.computer.org/library

☐ **IEEE Computer Society Digital Library — \$20,695**

The CSDL represents a great value for your institution. A subscription provides online access for 12 months to all archives of 32 periodicals at an over 25% discount off individual periodicals. Plus, you get access to more than 5,000 conference publications. Ideal for any academic, government, or corporate institution that needs comprehensive, top-quality computer science and engineering information.

☐ **IEEE Computer Society Periodicals Package — \$14,095**

The Periodicals Package represents a great value. A subscription provides online access for 12 months to all archives of all 32 periodicals in the CSDL at an over 50% discount from individual periodicals. Ideal for academic, government, or corporate institutions with a limited budget or those that don't need the latest research being published in our conference publications.

☐ **IEEE Computer Society Magazines Package — \$7,595**

Save 43% off the price of individual magazines with a Magazines Package. It provides online access for 12 months to all archives of the 13 magazines in the CSDL. This package, which is ideal for academic institutions with limited budget and only undergraduate programs, includes:

<i>Computer</i>	<i>IEEE Intelligent Systems</i>	<i>IEEE Security & Privacy</i>
<i>Computing in Science & Engineering</i>	<i>IEEE Internet Computing</i>	<i>IEEE Software</i>
<i>IEEE Annals of the History of Computing</i>	<i>IEEE Micro</i>	<i>IT Professional</i>
<i>IEEE Cloud Computing</i>	<i>IEEE MultiMedia</i>	
<i>IEEE Computer Graphics & Applications</i>	<i>IEEE Pervasive Computing</i>	

☐ **IEEE Computer Society Pick5 — \$4,075**

A Pick5 subscription saves an average of 24% off the cost of individual periodical subscriptions. With it comes online access for 12 months to your choice of any 5 of the 32 periodicals in the CSDL. This package is ideal for institutions needing only a slice of CSDL content or for those with significant budget limitations. There is a limit of one Pick5 subscription per customer.

Your institution may also qualify for special discounts:

- **Tier Pricing:** US and Canadian academic institutions with undergraduate-only programs may qualify for a 30% discount. US and Canadian academic institutions without undergraduate or graduate degree programs may qualify for a 50% discount.
- **Consortium Pricing:** Academic institutions worldwide may be eligible for consortium pricing. Purchasing power parity discounts may also apply for academic institutions in qualifying countries.
- **Multiple Site Discounts:** Available for all institutions with more than one campus location.

To place an order, complete both sides of this order form and return form with payment.

INSTITUTION INFORMATION. All prices are in US dollars.
